***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach a device for fastening an article to a ceiling or a wall, the device comprising a rod having a cylindrical body and at least a first fastener arrangement for fastening the article to the body of the rod in releasable manner and in a position that is adjustable along the rod, wherein the first fastener arrangement having a first assembly part in which a notch is formed, the first assembly part presenting two tabs formed projecting and defining between them an extension of the notch, the notch extending by a slot on the side opposite to the tabs the tabs and the portions of the assembly part that are situated on either side of the notch and the slot forming two branches suitable for being splayed apart elastically and placing on either side of the body in such a manner as to hold the first assembly part in place on the body by friction, with it being possible for the part to be slid manually in a longitudinal direction to a selected position along the body, and a second assembly part suitable for being secured to the first assembly part with the branches being clamped against the body in such a manner as to lock the first assembly part in the selected

position, in which the first and second assembly parts present mutual guide elements for guiding movement of the second part relative to the first, downwards parallel to the longitudinal direction of the body, to a final abutment position in which the clamping of the branches against the body is obtained.

### ***Conclusion***
